Subject: Preparing for State Secretaries
[resource discussion state secretaries 2013.docx](#)

Hi, Shawn. As you are aware, I sent several requests to the Divisions to help preparing you for your conversations with the State Secretaries on Thursday. Attached are the compiled list of answers from the divisions to questions I posed to both inform you with EPA's input to the discussions, and also that serve as conversation starters as several already have involvement from some or all of the states. I have edited them somewhat, but the topics themselves are the direct recommendations from the DD's, so I didn't completely exclude anything. This is just the first shot to make sure this information is along the lines of what you want. If you want more detail on any of it, or to get rid of any of it, just let me know.

There is some WPD information missing. They are usually right on top of providing what we ask for in the way we ask for it. However, as they have their state directors meeting Monday and Tuesday and had several people furloughing last week, what I received was a half a dozen emails with at least as many attachments including power points and other information. I gave them a little extra time to work with me to try to cull it into a usable format so that rather than a hundred pages of info, we have some talking points that you can use for these conversations. Hope to have that together by Tuesday.

In addition to these answers that are specifically to help build the conversation, we have asked for issue papers to update you on issues the Secretaries could bring up to you. The topics are based on input from the Divisions and Liaisons. They are listed below. If there are any you want to nix or add, please let me know: Fort Detrick; Curtis Bay Coast Guard Yard; Regenerative Stormwater Conveyance Structures; The Dana Mining/AMDRI Shannopin Mine; Commonwealth Crossing / Berry Hill; Buffalo Mountain/King Coal; Spruce Mine; Sparrows point; Marcellus Shale enforcement/regulatory update; WV 303d Overlisting; WV Senate Bill 615; Selenium Bill HR 2579; MS4/Stormwater; CAFOs; Air Transport; SO2 and PM designations; SSM SIP Call

We have a prebrief scheduled for Tuesday afternoon... but if there is any of this you feel

needs tweaking in the meantime... let me know. I will also have some other information available such as Gina McCarthy's recent talking points on sustainability as well as (hopefully) the info you asked for on EJ/Children's health. I am in contact with Nancy Grantham on that.

Thanks,

Cathy
